

STI PERFORMANCE PARTS

LEGACY OUTBACK (BP)

STI PERFORMANCE PARTS

Chassis/Body

SUPPORT F KIT

ST20106ZR000

This STI original sports performance part improves stability when cornering, and also fast and responsive steering performance with comfort ride.

* Be aware that installing any stiffening (chassis reinforcement) parts other than the above combination will prevent this product from achieving its full performance.

* While each part can be purchasing individually, we recommend installing the package.

* Specialized for turbo vehicles.

FLEXIBLE LOWER ARM BAR

ST2051221010

This lower arm bar has link balls on both ends and is to be installed between both ends of the under floor cross member. Similar to the flexible Tower Bar, this design controls the input of unnecessary forces.

* This product cannot be installed on non-turbo models, due to interference with exhaust piping.

FLEXIBLE TOWER BAR F

ST2050221011

This is a strut tower bar with a completely new concept - splitting an aluminum tower bar in the center and connecting the two pieces with pillow ball joints. As the left and right pieces are flexibly connected, the bar can moderately handle longitudinal forces such as from gaps on the road to maintain ride comfort while strongly holding against lateral forces during cornering. As a result, not only cornering performance but also straight-line stability and ride comfort is improved to enhance the comprehensive performance level of the car.

* We do not recommend installation of this product together with the lower arm bar (Part No. ST2051021010), since doing so will prevent the flexible tower bar from achieving its full performance.

Chassis/Body

**ENGINE MOUNT RH**

ST4100055110
ST4100055120

The hardened rubber on the mounting part of the power unit reduces unit vibrations. This product improves the throttle response and shift feeling.

* Installing this product increases vibration and noise in the car body.

* For competition only

**PITCHING STOPPER**

ST410404S000

The hardened rubber on the mounting part of the power unit reduces unit vibrations. This product improves the throttle response and shift feeling.

* Installing this product increases vibration and noise in the car body.

STI STI PERFORMANCE PARTS

Suspension

**REAR SUSPENSION LINK SET**

ST2029021000

The rubber bushes on both sides of the front link (toe control link) and inside of the rear link (lower lateral link) of the rear suspension have been changed to pillow ball bushes, and to hard bushes for the outside. The result is smoother operation of the rear suspension, with a reduction in the delayed response of the rear wheels, increased rigidity of the camber, and improved traction.

* This product cannot be installed on vehicles with SI-Cruise and EyeSight.

**STRUT MOUNT F**

ST2032021000

Hardened rubber products

STI PERFORMANCE PARTS

Wheel

STI VALVE CAP SET(Black)

ST28102Z2000 Black

These wheel valve caps are light weight with a design that features a knurled finish on machined aluminum to prevent slippage. Remove the standard valve caps to install these. A black alumite treatment has been applied to the surfaces of these valve caps to improve resistance to weather and match the color of aluminum wheels. The hexagonal heads of the valve caps have rounded tops, and a cherry red STI logo is stamped on the embossed area.

- 4-piece Set
- Black Alumite Treatment

*When storing tires and wheels, we recommend that valve caps be stored separately to prevent sticking.

STI VALVE CAP SET

ST28102ST030 Silver

These wheel valve caps are light weight with a design that features a knurled finish on machined aluminum to prevent slippage. Remove the standard valve caps to install these. A silver alumite treatment has been applied to the surfaces of these valve caps to improve resistance to weather and match the color of aluminum wheels. The hexagonal heads of the valve caps have rounded tops, and a cherry red STI logo is stamped on the embossed area.

- 4-piece Set
- Silver Alumite Treatment

*When storing tires and wheels, we recommend that valve caps be stored separately to prevent sticking.

SECURITY WHEEL NUT SET

ST28170ST060 GUN METALLIC

Set of 16 lug nuts and 4 lock nuts. Enhanced security with a more reliable locking mechanism. 3-layer nickel plated hard steel, with chrome finish to prevent rust. Gun metal finish with laser engraved STI logo. Special tool included (McGuard). M12x1.25mm

 Engine/Transmission

**RADIATOR CAP**

ST45137ST001

Opening value pressure changed from 108kPa(0.108MPa)standard value to 130kPa(0.13MPa). This radiator cap reduces the risk of overflow caused by the thermal expansion of coolant water even under severe conditions such as sports driving or circuit driving. Opening valve pressure unit changed from 'bar' to 'Mpa'.

* When replacing this product, pay careful attention to leakage of water from the piping, and be sure to inspect the coolant water at the start of work.

**AIR CLEANER ELEMENT**

ST1654621010

Non-woven fabric with a low airflow resistance is used as the filter medium, to which mesh is applied to increase rigidity. This prevents the filter medium from falling over or becoming deformed even at high engine speeds, for improved response and increased reliability during sports driving. In addition, the blue color of the filter medium combined with the red color of the resin frame provides an overall sporty appearance.

* Use of this product with non-compatible models could cause engine trouble and/or damage.

* Damage to the air flow meter due to replacement with this product may not be covered by the warranty for genuine products.

**OIL FILLER CAP**

ST15257ZR010

This oil filler cap consists of a die-cast aluminum base that has been machined, and given a stylish resin cover.

Shape of the cap has been specially designed to allow for use even when wearing work gloves.

For times when the cap is difficult to remove, it contains special service holes under the resin cover that allow you to use the on-board wheel wrench to loosen the cap when it is too tight to do so by hand. The silver aluminum base with embossed black cap showing the cherry red STI logo adds "functional beauty" to the engine compartment.

* A gasket is not included. Please use the one attached to the filler cap you removed. If using a new gasket, be sure to use a genuine product for the corresponding model.

* If this product is installed on non-compatible models, there is the risk of deformation in the oil filler neck.

* The logo may not face the front.

STI PERFORMANCE PARTS

Engine/Transmission

V-BELT ALT 874mm

ST08092ST000 ALTERNATOR/POWER STEERING 874mm

By changing the rubber material of the belts, 85 ° C high-temperature reverse bent resistance increased greater than x2, -35 ° C low-temperature resistance greater than x10 (based on our measurements). STI logo in 2 locations on the back of belts.

* Alternator/power steering side 874 mm, 5 ribs.

V-BELT AC 845mm

ST08092ST020 AIR CONDITIONER 845mm

By changing the rubber material of the belts, 85degrees high-temperature reverse bent resistance increased greater than x2, -35degrees low-temperature resistance greater than x10 based on our measurements. STI logo in 2 locations on the back of belts.

* Air conditioner side 845 mm, 4 ribs.

TIMING BELT

ST130284S000 EJ Engine

Specialized for EJ20 boxer DOHC engines. This product is developed based on motor sports specifications, and uses the same materials as for Impress WR cars that participate in the World Rally Championship (WRC). Improvements have been made in heat resistance and strength against tooth slippage, to control belt elongation. Reinforced, for racing.

*Belt noise might be produced.

*This product requires a V belt for the A/C compressor (SUBARU genuine part for each viecle).

*Although this product has been developed primarily for motorsports, it can also be used for street driving.

Engine/Transmission

**PERFORMANCE OIL FILTER**

ST15208ST010

This is an oil filter with enhanced performance thanks to an increased filtration area of 15% compared with a conventional product. With dedicated materials to improve its particle collection performance, this filter also captures fine particles such as carbon and reduces pressure loss by 10%. With the resulting reduced pump loss, this filter is compatible with high viscosity oil, providing stable performance not only on roads but also on the circuit track. It is painted cherry red and features the STI logo.

STI PERFORMANCE PARTS

Interior/Others

BATTERY HOLDER(SILVER)

ST82182ST010 SILVER

This unique battery holder has a design motif reminiscent of the flexible tower bar. In addition to securely holding the bulky battery, it also adds an attractive highlight to the engine compartment.

* This product can be installed in many SUBARU vehicles that use a D-type battery, such as the LEGACY, LEVORG, WRX, IMPREZA, FORESTER, EXIGA, and SUBARU BRZ. Example battery model number: 80D23R (Compatible with batteries with "D" as the third digit.)
* We recommend installation be carried out by your local SUBARU dealer.

BATTERY HOLDER

ST82182ST000 CHERRY RED

This unique battery holder has a design motif reminiscent of the flexible tower bar. In addition to securely holding the bulky battery, it also adds an attractive highlight to the engine compartment.

* This product can be installed in many SUBARU vehicles that use a D-type battery, such as the LEGACY, LEVORG, WRX, IMPREZA, FORESTER, EXIGA, and SUBARU BRZ. Example battery model number: 80D23R (Compatible with batteries with "D" as the third digit.)
* We recommend installation be carried out by your local SUBARU dealer.

PUSH ENGINE SWITCH

ST83031ST041

Push-button ignition starter switch for models with keyless entry and push-button starter switches. The cherry red button with the STI logo in the center gives the interior a sporty appearance. Cherry red button, with the STI logo in the center.

* For cars with keyless access and push-button start.

Interior/Others

**SIDE SILL PLATE SET**

ST5802021000

This product features an aluminum plate treated with black alumite and built into a resin molding. The STI logo appears in bright aluminum in the center of the plate, to enhance both the interior quality and the sporty feeling of the Legacy. Without processing, it is replaceable with standard side sill plate.
