

STI PERFORMANCE PARTS

SUBARU BRZ (ZD)

Chassis/Body

FLEXIBLE V BAR

ST20502Z2000

A pillow ball is sandwiched in the V bar which is connected to the front strut and the bulkhead to effectively utilize the bending of the chassis. As a result, this part improves steering responsiveness, providing nimble handling from the normal range at the start of steering to the limit zone.

In addition, while ensuring the rigidity required in the chassis, this product moderately removes external pressure such as road gaps, and flexibly diverts vibrations.

This can be easily installed by simply replacing the standard V bar.

* To install this product, SUBARU genuine SPACER SKIRT NUT (50827CC000) x 6 and FLANGE BOLT (901000404) x 2 are required (sold separately).

FLEXIBLE DRAW STIFFENER Rr

ST20168VR000

In addition to increasing the rigidity at the front of the car with the FLEXIBLE V BAR or FLEXIBLE TOWER BAR, we recommend that you also install this product, to improve the followability of the rear of the car together with the FLEXIBLE V BAR or FLEXIBLE TOWER BAR.

By attaching this to the rear ends of the left and right rear frames (inside the rear bumper) and applying moderate tension, it corrects the bending of the chassis when the car is running. This leads to both initial agile steering and a smooth ride.

As this part improves the road-contact of the four wheels, driving stability during cornering increases, and thus a quick and straightforward steering feeling can be realized.

This product comes with a original sticker. (Sticker size: length 41 mm x width 36 mm)

* To install this product, removal and reattachment of the rear bumper face is required.

* The included sticker is a complimentary gift and not sold separately.

Please note that the sticker is not eligible for repair caused by a mistake in applying or damage in its use.

* The images illustrate how this product is installed on the LEVORG (VN type) and SUBARU BRZ (ZD type).

Please note that this product is actually installed inside the bumper and is not visible from the outside.

* On the LEVORG (VM type) this part cannot be installed together with the STI Rear Under Spoiler (part number: SG517VA360, SG517VA310) because the mounting location is the same.

* Cannot install together with other products(Ex. Hitch member) which attaches to the bumper beam.

Suspension

**LATERAL LINK SET**

ST20250ZM000

Set of 4 lateral links with pillow ball bushes. By changing the rubber bush inside a lateral link to a pillow ball bush, friction is reduced and caliper rigidity improved during a stroke, sharp handling is achieved during cornering, and linear suspension features from entering until exiting a turn are achieved. Pillow ball bushing (2 x 2 locations), press fitted.

STI PERFORMANCE PARTS

Wheel

STI PERFORMANCE WHEEL Set BBS 18inch 7.5J (MAT GREY)

ST28100ZM000 MAT GREY

Incorporating the wheel development concept cultivated in motorsports, this forged aluminum one-piece wheel has been tuned exclusively for the new SUBARU BRZ.

Carrying over the same design as the wheel used in the actual races of SUPER GT, Japan's top motorsport category, this product is available in two colors - matte bronze and matte gray.

This product has fully inherited the functionality and reliability in extreme conditions including the adoption of an anti-slip paint that suppresses wheelspin and the steel bushes, making it suitable for the SUBARU BRZ.

With this forging method a significant weight reduction has been achieved, contributing to improved steering response.

* Center cap and air valve included

STI PERFORMANCE WHEEL Set BBS 18inch 7.5J (MAT BRONZE)

ST28100ZM010 MAT BRONZE

Incorporating the wheel development concept cultivated in motorsports, this forged aluminum one-piece wheel has been tuned exclusively for the new SUBARU BRZ.

Carrying over the same design as the wheel used in the actual races of SUPER GT, Japan's top motorsport category, this product is available in two colors - matte bronze and matte gray.

This product has fully inherited the functionality and reliability in extreme conditions including the adoption of an anti-slip paint that suppresses wheelspin and the steel bushes, making it suitable for the SUBARU BRZ.

With this forging method a significant weight reduction has been achieved, contributing to improved steering response.

* Center cap and air valve included.

WHEEL SET 17inch(SILVER/GUN METALLIC/BLACK)

ST28100MF050 PT Silver 17x7.5J+48 PCD100 5HOLE

ST28100MF060 GUNMETALLIC 17x7.5J+48 PCD100 5HOLE

ST28100MF080 BLACK 17x7.5J+48 PCD100 5HOLE

These cast aluminum wheels were made using the spinning production process to form the shape of the rims. This ensures a reduced weight with increased rigidity. Their design with 15 straight spokes perfectly matches the Forester/SUBARU BRZ body design and its colours.

* The spinning process is a special method for producing aluminum wheels. It involves rapidly rotating the workpiece and pressing it until it conforms to the desired shape. This causes the aluminum molecules to be in close contact with each other, increasing strength while reducing weight and thickness.

* Compatible with Brembo 4POT calipers

STI PERFORMANCE PARTS

Wheel

WHEEL SET 18inch(SILVER/GUN METALLIC/BLACK)

ST28100MF250 SILVER 18x7.5J+48 PCD100 5HOLE
 ST28100MF260 GUN METALLIC 18x7.5J+48 PCD100 5HOLE
 ST28100MF280 BLACK 18x7.5J+48 PCD100 5HOLE

These cast aluminum wheels were made using the spinning production process to form the shape of the rims. This ensures a reduced weight with increased rigidity. Their design with 15 straight spokes perfectly matches the Forester/SUBARU BRZ body design and its colours.

* The spinning process is a special method for producing aluminum wheels. It involves rapidly rotating the workpiece and pressing it until it conforms to the desired shape. * Compatible with Brembo 4POT calipers

SECURITY WHEEL NUT SET

ST28170ST060 GUN METALLIC

Set of 16 lug nuts and 4 lock nuts. Enhanced security with a more reliable locking mechanism. 3-layer nickel plated hard steel, with chrome finish to prevent rust. Gun metal finish with laser engraved STI logo. Special tool included (McGuard). M12x1.25mm

STI VALVE CAP SET

ST28102ST030 Silver

These wheel valve caps are light weight with a design that features a knurled finish on machined aluminum to prevent slippage. Remove the standard valve caps to install these. A silver alumite treatment has been applied to the surfaces of these valve caps to improve resistance to weather and match the color of aluminum wheels. The hexagonal heads of the valve caps have rounded tops, and a cherry red STI logo is stamped on the embossed area.

- 4-piece Set
- Silver Alumite Treatment

*When storing tires and wheels, we recommend that valve caps be stored separately to prevent sticking.

Wheel

**STI VALVE CAP SET(Black)**

ST28102Z2000 Black

These wheel valve caps are light weight with a design that features a knurled finish on machined aluminum to prevent slippage. Remove the standard valve caps to install these. A black alumite treatment has been applied to the surfaces of these valve caps to improve resistance to weather and match the color of aluminum wheels. The hexagonal heads of the valve caps have rounded tops, and a cherry red STI logo is stamped on the embossed area.

- 4-piece Set
- Black Alumite Treatment

*When storing tires and wheels, we recommend that valve caps be stored separately to prevent sticking.

STI PERFORMANCE PARTS

Aero/Exterior

FRONT UNDER SPOILER

SG517CC000 (E2410CC000)

This is a resin aerodynamic control part to be attached under the front bumper.

By rectifying the airflow received by the front part of the car during high-speed driving and generating negative lift, this part improves the grounding property of the front tires.

The shape with a sense of unity with the front bumper has been verified for performance in repeated wind tunnel experiments to achieve both good design and performance.

This product is painted in semi-gloss black and comes with an emblem with the STI logo.

By installing the SKIRT LIP (sold separately: ST96020ST060 BLACK/ST96020ST070 CHERRY RED), the rectification effect is further enhanced and the front under spoiler is protected from contact with the road surface.

* The ground clearance of the mounting area will drop by about 23 mm.

SIDE UNDER SPILER

SG517CC101 (E2610CC001)

This is an aerodynamic part that rectifies the air flowing from the front to the body side of the car and enhances driving stability. It streams the air that flows into the underside of the body and pushes up the car to the rear. This product is designed to be installed together with the FRONT UNDER SPOILER (E2410CC000), and when both of them are installed together, optimum performance can be achieved.

* The ground clearance of the mounting area will drop by about 5 mm. Please be careful not to use this product as a step board. It is not designed to be stood on and can break.

Please consult with your local SUBARU dealership or an authorized SUBARU distributor to confirm the compatibility of the parts available on this website.

REAR SIDE UNDER SPOILER

SG517CC200 (E5610CC000)

This is an aerodynamic part that rectifies the airflow from the front to the rear and optimizes the aerodynamic balance between the front and rear of the car.

When this product is installed together with the FRONT UNDER SPOILER(E2410CC000) and SIDE UNDER SPOILER(E2610CC000), a seamless flow in the overall design can be created to provide a visual sense of unity.

* The ground clearance of the mounting area will drop by about 8 mm.

Please be careful not to use this product as a step board. It is not designed to be stood on and can break.

Aero/Exterior

**SKIRT LIP (BLACK)**

ST96020ST060 BLACK

This product is intended for the new SUBARU BRZ (ZD) equipped with the FRONT UNDER SPOILER(SG517CC000).

This is an aerodynamic part to be attached to the ends of the undersurface of the FRONT UNDER SPOILER. This part also provides a protective function.

While this has an aerodynamic design which improves handling stability by rectifying the travelling air taken from the front on the vehicle floor, the well-thought design of this part matches the design around it.

This is a left and right split type.

* The ground clearance of the mounting area will drop by about 15 mm.

* This product must be installed with the SUBARU genuine accessory, STI FRONT UNDER SPOILER (SG517CC000).

*This product cannot be installed together with the SUBARU Genuine accessory, BODY COVER.

**SKIRT LIP (CHERRY RED)**

ST96020ST070 CHERRY RED

This product is intended for the new SUBARU BRZ (ZD) equipped with the FRONT UNDER SPOILER(SG517CC000).

This is an aerodynamic part to be attached to the ends of the undersurface of the FRONT UNDER SPOILER. This part also provides a protective function.

While this has an aerodynamic design which improves handling stability by rectifying the travelling air taken from the front on the vehicle floor, the well-thought design of this part matches the design around it.

This is a left and right split type.

* The ground clearance of the mounting area will drop by about 15 mm.

* This product must be installed with the SUBARU genuine accessory, STI Front Under Spoiler (SG517CC000).

*This product cannot be installed together with the SUBARU genuine accessory, Body Cover.

STI PERFORMANCE PARTS

Aero/Exterior

DRY CARBON REAR SPOILER

ST96050ZM000

This DRY CARBON REAR SPOILER incorporates the design of swan-neck-shaped stays also used in the SUBARU BRZ GT300 which participates in the SUPER GT GT300 class.

When this product is installed, the downforce on the rear of the car is increased and driving stability at high speeds can be improved.

With the wing-tips also integrated as winglets, this carbon rear spoiler has realized light weight and well-balanced aerodynamics as well as good handling stability.

Two-step angle adjustment is possible depending on the driving situation.

* This product cannot be installed together with SUBARU GENUINE accessories of the Trunk Spoiler and Body Cover.

* Since this product is made of carbon (main body) and aluminum casting (stays), pinholes and twists in the carbon weave may occur, but these are not defects.

FRONT FENDER GARNISH

ST91112ZM000

This is a dress-up part to be attached to the front air outlet.

The main body of this product is made of vacuum-formed ABS resin.

The matte silver STI logo stands out on the matte black paint, complementing the front air outlet area.

* This product cannot be installed together with the SUBARU GENUINE accessory, AIR OUTLET GARNISH.

DOOR MIRROR COVER CHERRY RED

ST91054Z2000 Cherry Red

ST91054Z2010

With this stylish Door Mirror Cover painted in cherry red, you can create a sporty appearance reminiscent of the NBR Challenge or SUPER GT racing cars. As this add-on is a genuine replacement part and the same shape as the original cover, no special work is required to install it on your car.

* The image shows how it looks when ST91054AS010 is fitted on a SUBARU BRZ STI Sport.

* This product is sold for the left and right-hand sides separately.

* The explanation of this product is for Japanese specification.

STI PERFORMANCE PARTS

Aero/Exterior

DOOR HANDLE PROTECTOR

ST91099ST060

This is a carbon-effect door-handle protector which protects the car from scratches and fingerprints when opening/closing doors. Designed for a grip-type door handle, this not only serves as scratch prevention, but also adds a sporty touch to the door handle surroundings. It can be mounted along the dented form of the door and is pressure-bonded with powerful double-sided tape.

* Chemical-based products such as waxes and coating agents or solvents including gasoline and thinners can cause stains and deformation of the product. If the cover comes into contact with such chemicals or solvents, clean the product immediately.

* Please note that the product may detach or loosen if the car is cleaned under high-pressure or steam washing.

* A set of 2 pieces of the same size for 1 vehicle (2 doors)

* Carbon-effect PVC

DOOR HANDLE PROTECTOR

ST91099ST140 SILVER

This is a carbon-effect door-handle protector which protects the car from scratches and fingerprints when opening/closing doors. With the addition of the new silver color, it is now more suitable for use with silver or white light-colored car bodies.

Designed for a grip-type door handle, this not only serves as scratch prevention, but also adds a sporty touch to the door handle surroundings. It can be mounted along the dented form of the door and is pressure-bonded with powerful double-sided tape.

* Chemical-based products such as waxes and coating agents or solvents including gasoline and thinners can cause stains and deformation of the product. If the cover comes into contact with such chemicals or solvents, clean the product immediately.

* Please note that the product may detach or loosen if the car is cleaned under high-pressure or steam washing.

* A set of 2 pieces of the same size for 1 vehicle (2 doors)

* Carbon-effect PVC

* The surface of the product may become cloudy when it is exposed to moisture such as rainwater for a long time. However, this is a characteristic of the material used (PVC) and is not abnormal. It will be restored when dry.

TRUNK LID GARNISH CHERRY RED

ST91042Z2000

* The surface may become white or cloudy if exposed to moisture such as rainwater for an extended period of time. However, this is a characteristic of the material (Hyboscail=PVC) and is not abnormal. The color will return to normal when dry.

STI STI PERFORMANCE PARTS

Aero/Exterior

**TRUNK LID GARNISH BLACK**

ST91042Z2010

* The surface may become white or cloudy if exposed to moisture such as rainwater for an extended period of time. However, this is a characteristic of the material (Hyboscal=PVC) and is not abnormal. The color will return to normal when dry.

STI PERFORMANCE PARTS

Brake

DRILLED DISC F

ST26300ST000

This is a brake disc rotor that provides stable braking performance, pad controllability and improved cooling capability.

Along with the drilling of the disc surface and the internal structure of the spiral vein, the cooling performance from high temperatures has improved by approximately 7%.

Owing to its cleaning performance on the brake pad surface and degassing effect at brake fade, this rotor stabilizes the mu characteristics of the pads. This and its structure with improved rigidity, create a synergetic effect to enhance pad controllability.

* This comes only one piece. 2 pieces are necessary per vehicle.

* It is recommended that this rotor is used together with the STI Brake Pad (Front: ST26296ST020 /Rear: ST26296ST030). (The rotor can also be combined with a standard pad.)

* The rotor cannot be installed on the GT model as it is fitted with Brembo calipers.

* Please confirm before purchase that the car to be fitted with the rotor has 16 inch discs in the front / 15 inch ventilated discs in the rear.

DRILLED DISC R

ST26700ST000

This is a brake disc rotor that provides stable braking performance, pad controllability and improved cooling capability.

Along with the drilling of the disc surface and the internal structure of the spiral vein, the cooling performance from high temperatures has improved by approximately 7%.

Owing to its cleaning performance on the brake pad surface and degassing effect at brake fade, this rotor stabilizes the mu characteristics of the pads. This and its structure with improved rigidity, create a synergetic effect to enhance pad controllability.

* This comes only one piece. 2 pieces are necessary per vehicle.

* It is recommended that this rotor is used together with the STI Brake Pad (Front: ST26296ST020 /Rear: ST26296ST030). (The rotor can also be combined with a standard pad.)

* The rotor cannot be installed on the GT model as it is fitted with Brembo calipers.

* When fitted to the RA Racing model, a vehicle will not conform to 'GAZOO RACING 86/BRZ Race' regulations.

* Please confirm before purchase that the car to be fitted with the rotor has 16 inch discs in the front / 15 inch ventilated discs in the rear.

STI PERFORMANCE PARTS

Engine/Transmission

GEAR SHIFT LEVER ASSY

SG117CC000 (C1010CC000) 6MT

This short stroke gear shift lever assembly allows fast shifting that is perfect for sports car driving. It has a modified lever ratio and redesigned joint to provide a forward/backward stroke that is 4 mm shorter than standard. This enables rapid and direct gear shifting.

OIL FILLER CAP

ST15257ZR011

This oil filler cap consists of a die-cast aluminum base that has been machined, and given a stylish resin cover.

Shape of the cap has been specially designed to allow for use even when wearing work gloves.

For times when the cap is difficult to remove, it contains special service holes under the resin cover that allow you to use the on-board wheel wrench to loosen the cap when it is too tight to do so by hand. The silver aluminum base with embossed black cap showing the cherry red STI logo adds "functional beauty" to the engine compartment.

* A gasket is not included. Please use the one attached to the filler cap you removed. If using a new gasket, be sure to use a genuine product for the corresponding model.

* If this product is installed on non-compatible models, there is the risk of deformation in the oil filler neck.

* The logo may not face the front.

* After installation, please ensure that this part does not come into contact with any surrounding components.

STI PERFORMANCE PARTS

Interior/Others

LEATHER SHIFT KNOB 6MT

SG117CC100 (C1010CC100)

This premium shift knob features a combination of aluminum and dimpled genuine leather. The STI logo and shift pattern are stamped on the top of the knob. An optimal balance of materials, form, and weight has been selected with consideration for operational feel.

LEATHER SHIFT KNOB AT

SG117CC110 (C1010CC110)

SHIFT KNOB DURACON 6MT

ST35022ST401

This redesigned shift knob is made from the extremely popular lightweight and tough Duracon(R)* material. The shape of the knob has been redesigned and refined to ensure reliable response during shifting. The shift pattern on the top has been modified to a carbon-based design to give a more sporty image.

* Duracon (R) is a registered trademark of Polyplastics Co., Ltd. in Japan and other countries.

* The shift knob may become hot/cold from exposure to direct sunlight or fluctuations in temperature. The use of driving gloves is recommended.

STI PERFORMANCE PARTS

Interior/Others

SIDE SILL PLATE SET

ST58020ZM000

The hairline-finished plate surface features an etched checkered flag pattern and a cherry red STI logo, enhancing the quality feel of the SUBARU BRZ and giving it a sportier appearance. Designed in the genuine factory shape, it integrates a stainless steel plate with a resin molding and is a replacement type for the standard-installed part. Sold as a set of two for left and right sides.

STSG21100551

The inner part of the door can become scratched or dirty when shoes or bags contact the area as passengers get in and out of the vehicle. In order to avoid this, this protector is recommended.

In addition to its protective qualities, this product can also enhance the interior atmosphere with its sporty look.

The quality of this protector is guaranteed as it uses the same material as the popular product "Door Handle Protector".

By utilizing a thicker PVC material, this product is more durable than sticker-type protectors and is difficult to come off due to a strong-adhesive sheet used on its sticky side.

BATTERY HOLDER

ST82182ST000 CHERRY RED

This unique battery holder has a design motif reminiscent of the flexible tower bar. In addition to securely holding the bulky battery, it also adds an attractive highlight to the engine compartment.

* This product can be installed in many SUBARU vehicles that use a D-type battery, such as the LEGACY, LEVORG, WRX, IMPREZA, FORESTER, EXIGA, and SUBARU BRZ. Example battery model number: 80D23R (Compatible with batteries with "D" as the third digit.)

* We recommend installation be carried out by your local SUBARU dealer.
